

The one-day **Baby CSF Therapy is Saturday, October 1, 2011.** This course is offered as additional training for birthing professionals after completion of the General Techniques seminar. Two opportunities to learn CSF techniques: The first scheduled for September 16-18, 2011 in King of Prussia PA, with the second September 28-30, 2011 in Myerstown, PA. Baby CSF Therapy is also open to students who have previously completed the three-day General Techniques seminar.

We hope to see you there.

Welcome to our first newsletter, which we'll send out every two months to keep you updated on the latest news, techniques and seminars. The website brain-therapy.com is now undergoing extensive renovations and we hope to unveil a new, user-friendly and interactive site by the time the next newsletter rolls out.

Part of the changes underway is a changing of the guard - Brain Therapy has now become Craniosacral Fascial Therapy, or CSF Therapy, so named to more accurately reflect what we do. The Brain Score is now the Baby Brain Score, used on babies just after they're born.

More details to follow. We welcome your comments, questions and feedback and hope you'll be part of the CSF Therapy revolution.

Dr. Barry Gillespie

CSF Therapy, or Craniosacral Fascial Therapy, is the integrated approach combining Craniosacral Therapy, fascial release and other methods innovated by Dr. Barry Gillespie.

"Clients have told me I am able to get to the core of the problem that seemed to elude me before."

Donna Fae Dodson, R.N., L.M.T.
Rochester, NY

BABY RESEARCH SHOWS CSF TREATMENTS HOLD OVER TIME

Please email me with any questions about the seminars or if you have questions about integrating CSF Therapy into your practice at drbarryrg@me.com

"CSF Therapy makes up 40% of my practice. Also, it will lengthen my career, as it is physically easier to do.

The children are responding to CSF Therapy so well that their parents are amazed. The fact that there is an end to treatment has parents very willing to try therapy."

Daniel G. Jobson, P.D.M.T.,
Perkiomenville, PA

The Brain Score Approach

Newborn Evaluation and Treatment for a Lifetime of Neurological Wellness

Based on Dr. Gillespie's professional clinical experience since 1977,

Nearly 200 babies have been evaluated since 2006 with the early results overwhelmingly indicating that every newborn evaluated and treated has responded positively to both the Baby Brain Score and Craniosacral Fascial (CSF) Therapy. The newborns are being treated for colic, gas, constipation as well as nursing and other issues as part of an ongoing study underway in Lancaster County, Pennsylvania. Dr. Barry Gillespie is working with Kristen and Michael Myers to follow up with the children one year after treatment to determine whether the original conditions had been corrected, whether any new conditions have emerged and how the CSF system held up over the first year of life. Early results to date confirm that each newborn held excellent brain and sacral cycles. The researchers expect to have a total of 300 babies participating in the study for completion in the winter of 2013.

Stay tuned for more revelations!
